## **CAMCARB XG**

A 🔛 🔤 🏛

## ADVANTAGES

- Inherently leak-free design when installed in dedicated hardware
- Corrosion resistant and low-dusting construction
- Predicted removal efficiency and lifetime by Camfil's proprietary software
- Typical target gases: hydrogen sulfide, VOCs, ozone, formaldehyde, nitrogen dioxide, and other acids and bases
- The conical shape provides the highest removal efficiency and lowest pressure drop
- 30% lighter than metal cylinders
- Ergonomic filter design for improved handling

| Application          | The most reliable molecular filter for high efficiency and long-term<br>control of molecular contaminants in sensitive buildings and<br>process industries.<br>They may also be used in odour removal applications in pulp and<br>paper mills and wastewater treatment plants, or lighter<br>applications such as airports, cultural heritage buildings, and<br>commercial offices. |
|----------------------|---|
| Frame                | ABS   |
| Gasket               | Outlet seal, molded TPE   |
| Media                | Activated Carbon;Impregnated Activated Carbon;Impregnated Activated Alumina   |
| Max Temperature (°C) | 80  |
| Min Temperature (°C) | -21   |
| Installation Options | Front access mounting frames and side access housings are available. See related products below.  |
| Comment              | Universal mounting knobs to accommodate 1.5 or 2 mm mounting<br>frames.<br>Sixteen (16) XG's are applied per 610 x 610mm (24" x 24") opening.<br>Can be filled with any loose-fill molecular media.   |

Filter performance will be affected if used in conditions where T and RH are above or below the optimum conditions.

#1 - Other models with different media options are available. High-performance media will be selected in accordance with the type of application.

#2 - Pressure drop at maximum rated airflow.

^3 - Filled with UL-approved media
